

Undergraduate Body To Meet Today In Ballroom

Students' Society To Convene At Five O'clock — Issue Of Abolishment Of Annual Meetings To Be Discussed — Gerald Halpenny, President Of Society, Urges All Students To Attend

Opening Supper To Begin S. C. M. Year

ALL undergraduates of the University, including Freshmen and Freshettes, will have the opportunity to exercise their franchise as members of the Students' Society at its meeting to be held today at five o'clock in the Ball Room of the McGill Union. Gerald Halpenny, President of the Society, urges as many students as possible to turn out to this important Annual Meeting and to voice any opinion or suggestions that they may wish towards the improvement of management of college affairs.

Issue To Be Discussed

The important issue to be brought up at this meeting is concerning the abolishment of annual meetings of the Society. This motion was first introduced at a meeting of the Society held two years ago, but was referred to the Advisory Board of the Students' Council who were to decide on further action to be taken on this matter. The Board has since deemed it advisable to re-introduce the motion before the general student body, to be voted upon by it without further delay. This will put the final stamp upon an issue which has been before the Society for the past two years.

The Society holds two meetings a year, the Annual Meeting held on the third Wednesday of October and the Semi-Annual on the third Wednesday in March, where all business pertaining to the administration of the Student body may be brought up for discussion. The Society has two officers; the President, elected annually, who this year is Gerald Halpenny; and the Secretary-Treasurer, appointed by the Students' Executive Council, the office of which is filled by G. H. Fletcher.

S. C. M. Elected Annually

The Students' Society elects annually for the regulation of all undergraduate activities, an executive known as the Students' Executive Council of McGill University, to carry out the policy of the Students' Society and to act as an intermediary between the student body and the faculty. For this reason the Council is composed of one elected representative of each faculty in the University. The President of the Students' Society, who is elected every March by a ballot of all the members of the Society, automatically fills the position of Chairman.

Engineers' Institute Sponsors Lectures

Junior Section Holds First Meeting Tonight

The Junior Section of the Engineering Institute of Canada is holding the first meeting of the season at eight o'clock tonight. These meetings are held on the first and third Wednesdays of every month and consist usually of two twenty-minute papers of general engineering interest, presented in a non-technical manner. After each paper there is a short informal discussion period in which anybody may join. The meetings are open to all engineering students and membership in the Institute, although advisable, is not necessary.

The Junior Section thus affords an opportunity for students of McGill to meet the French-speaking students of the city, and for both to meet the younger members of the engineering profession.

No papers are being presented at the first meeting but the meeting will be addressed by Dean Brown of the Faculty of Engineering and by a professor of the Ecole Polytechnique. All Engineering students are invited to this meeting which will be held at the Institute rooms, 2050 Mansfield Street. Refreshments will be served.

Special For Students Transportation To And From City Lectures Arranged

Arrangements have been made between the Canadian National Railways and the Macdonald College authorities for the transportation of parties of students between Ste. Annes station and Montreal for the purpose of attending courses in connection with McGill University. A first class coach will be supplied by the railway for this purpose, operating each Wednesday from October 18 to November 22 inclusive, train leaving Ste. Annes at 7:57 a.m. and returning from the city at 5:15 p.m.

Exact Meaning Of Philosophy Topic Of Club's Search

THE first meeting of the session of the Philosophy Club will be held at Strathcona Hall at 8 o'clock tomorrow night. All students of philosophy and all others interested are invited to attend. Refreshments will be served.

The Philosophy Club utilizes the method of discussion. The speaker, who in this case is Professor MacLennan, gives a short talk at which he takes a definite stand on some philosophical question. Opinions are then voiced by all who wish to do so. The subject under discussion tomorrow evening is "The Nature of Philosophy."

Spanish Club Pays Tribute To Consul-General Moreno

Presentation Will Be Made At Opening Meeting Tonight

ONCE again the McGill Spanish Club, attempting to reproduce to some extent the spirit of old Spain, begins its activities coincident with the start of the new college session. The first meeting of the season, to be held tonight at the McGill Union at 8:15, is taking place primarily as a farewell function to the Spanish Consul General of Montreal, S. D. de Rojas y Moreno, who is leaving with his family to spend the winter in his homeland.

Make Presentation

A token of esteem, in the form of an engraved walking stick will be presented to the Guest of Honor. An elaborate program has been planned by the executive of the club, which is to consist mainly of musical selections, mostly of a Spanish nature.

Future Policy

Remarks with reference to the future policy of the club will be delivered by the treasurer L. F. Denton. The former president, A. G. Leroux, will deliver a report of the activities of the club for the preceding season. There is a membership fee of \$3.00 for non-students, and of \$2.00 for students. Remittances should be made to R. F. Denton, treasurer. Members in good standing will be given a special membership card, to be presented at the door for each meeting.

Evening's Program

The program prepared is as follows: 1. Algunas observaciones al abir formalmente el Club.—L. F. Denton, tesoro.

2. Reporte sobre nuestras actividades del año pasado.—A. G. Leroux Ex-Presidente.

3. Musica Espanola: (a) Solo de piano, Wm. A. Sugars; (b) Solo de Canto, Senor I. Magana; (c) Solo de violin, J. T. Lapointe.

4. Breve discurso de nuestro presidente honorario.—Prof. R. M. Sugars.

5. Musica Espanola: (a) Solo de piano, Wm. A. Sugars; (b) Solo de Canto, Senor I. Magana; (c) Solo de violin, J. T. Lapointe.

6. Canciones en Corro.—(todas juntas).

7. REFRESCOS.

Glee Club Gathers To Practise Songs

"Jolly Good Ale" Title Of Last Night's Selection

According to members of the Executive, the McGill University Glee Club had a very successful rehearsal in the Ballroom of the Union last night. The attendance was around forty and the song rehearsal was the "Jolly Good Ale" by C. W. Cobb, arranged by Musical Director Louis C. Theobald. It is intended to prepare the programme this fall and to present it around Christmas time at the Musical Association concert. Tentative plans include a trip to Ottawa to perform before the Capital branch of the McGill Graduates Society, and a possible visit to one of the New York state universities. There is still room left for a few seconds basses and second tenors.

R.V.C. '37 Elections

The class of R.V.C. '37 met yesterday for the election of its officers and the following will preside over the destinies of the freshmen: President, Barbara Barker; Vice-President, Ellen Crutchlow; Secretary-Treasurer, Betty Weidon; Athletic Representative, B. Taylor; Delta Sigma Representative, Jessie Carroll; Societe Franciscaine, Marguerite Dubois; Poster Manager, Jane Smart.

Attention Players' Club

The meeting today will be held at four o'clock instead of five, so that all members can attend the meeting of the Students' Society. Meeting Place: Union Ballroom.

Science Tends To Discourage Poetry Says Doctor Files

English Literature Society Met Yesterday In Union

T. S. ELIOT PRAISED

Contents That New Type Of Poetry To Suit Modern Ideas Has Arisen

In a speech before the English Literature Society yesterday afternoon, Dr. Files gave a description of the modern trend in poetry. He described the change of public opinion and its influence on modern poetry, showing the elements which are producing a new type of poetry to suit twentieth century ideas. He called T. S. Eliot the spokesman of the new poetry. Morton Bloomfield, the president, called the meeting to order and gave the floor to the Secretary, R. M. Hamilton. The Secretary proposed that two members be appointed to aid the Executive in forming a new constitution. The motion was seconded and the President announced Dr. Files as the speaker for the afternoon, remarking that as a well known member of the faculty, Dr. Files needed no introduction.

Poetry Discouraged

Dr. Files declared that the new scientific attitude, by its lessening of human dignity, tends to place poetry in disfavor. The idea that man is an insignificant insect on a dwarf star tends to promote a cynical attitude which discourages poetry. It is the opinion, however, of some poets, as well as critics, that this produces all the more the need of courageous poetic souls to challenge the mystery of existence and to make bold affirmations.

Campbell attacks poets who exhibit opposite qualities, showing hostility to his contemporaries because of their timidity, "their prudence and their chat." They need to be awakened, he thinks, from their tendency to capitalize the poetry of the past.

Points Of View Outlined

The fact that many people fail to see any leadership in the present generation of poets is ominous and has resulted in a pessimistic attitude.

Half Price Granted To McGill Students

Department Of Extra-Mural Relations Sponsors Lectures

COURSES EXTENSIVE

Classes In French, German, Italian And Spanish Available

McGill students will have a chance to learn or improve their knowledge of French, German, Italian or Spanish. The Department of Extra-Mural Relations, in co-operation with the Mechanics Institute of Montreal, announces evening classes at half price for students of the University.

Classes in French, under the leadership of Mlle. Idola Saint Jean started Monday, October 2, at the Mechanics Institute, Atwater avenue. Elementary courses are held Monday and Wednesday at 6:15 or Monday and Friday at 7:30. The fee for the course, which comprises 30 lectures, is \$10. There are advanced classes Tuesday and Friday at 5:15 or Monday and Friday at 8:30, at a fee of \$12 for thirty lectures.

Italian Classes

Classes in Italian began October 2 at the Mechanics Institute and under Dr. Alfred Foscati take place Wednesday evenings at 8:30. The fee for the 25 lectures in this course is \$10. German students meet at the Chemistry Building Wednesday evenings at 8:15. This course, which began also October 2 comprises 25 lectures under Miss S. G. Solomon, B.A., at a fee of \$10.

Twice A Week

Spanish classes are held twice a week at a price of \$12.50. For further information apply to the Secretary, Department of Extra-Mural Relations, McGill University.

McGill students are urged to take advantage of the fact that they may get these lectures at half-price.

Rhodes Scholarships

Applications and information regarding the Rhodes Scholarship can be obtained from Col. G. S. Stairs, 132 St. James Street, West, or from Professor T. W. MacDermot, McGill University. Students at McGill from provinces other than Quebec can send their applications to the Secretary of the Selection Committee for the province of origin, if they so wish.

Savory Odors Of Rat Overwhelm Professor

ONCE again the Shadow of Death armed, we are given to understand, with the customary sickle, has cast his shadow over the university.

A certain prominent member of the staff of the Chemistry Department upon entering his room the other day gave vent to the pronounced sniff with which he is wont to herald his comings and goings. He was reminded instantly that the human proboscis is designed rather as a receptacle of odours than as a register of disdain.

Reeling slightly and holding a hand to his brow, he staggered from the room. Divining instantly that the smell was of organic origin, the Professor hastily summoned several colleagues whose batting averages in the organic league are well above par. But even they failed. The nature of the smell remained an elusive mystery.

The janitor was summoned. He approached. "Ol," he shouted, "rats." And so it was.

The prominent professor is at present occupying temporary quarters.

Distinguished Prize Open To All Scientific Workers

McCharles Prize To Be Awarded By University Of Toronto

Election Results Made Public As Society Gathers

Graduates Held Meeting In Arts Building Last Night

THE fourth annual meeting of the McGill Graduates' Society was held last night in the Arts Building. After the routine business was concluded, the results of the election of officers were made public. According to them, the Vice-President for 1933-34 will be A. A. Bowman and the Honorary Secretary, O. N. Brown. The Executive Council will be made up of Mrs. G. St. G. Sproule, H. R. Mulvena, J. H. D. Ross, J. C. Flanagan and G. C. Hammond.

The newly elected officers were introduced to the Society and were tendered a welcome by the President, after which a vote of thanks was extended to the retiring officers by John T. Hackett, K.C., O. E. Abbot, H. P. McLean, H. S. Maxwell, have been elected members of the Nominating Committee for two years.

A general discussion of the Society's activities then took place. Concerning the future smoker on February 1st, it was suggested that Professor Stephen Leacock, be the guest speaker. Following this the Graduates' Theatre night, Supper, Dance, and Graduates' Reception were discussed. A suggestion that the McGill handbook should be (Continued on page 4)

Dancers Promised Good Entertainment

Union House Informal Takes Place Friday Evening

An excellent orchestra, capital refreshments, first-class decorations and entertainment have been promised by the Union House Committee for Friday night's Union House Informal. The event, it is announced, will be run in the cabaret style, and the price of the tickets has been set at one dollar per couple. Tickets may be obtained from any member of the Committee, from Bill Gentleman in the Arts Building, Harry Grimdale in the Engineering and Mr. Hort in the Medical Building, and also at the Tuck Shop.

Although the sale was very brisk yesterday there still remains a number of pasteboards to be sold. The price has been reduced to their lowest possible figure, and the orchestra which will be in attendance will be as good as any which dancers would get at the Junior Prom, it was stated. In fact, it has played at most college functions last year. The decorations will consist of flags and pennants obtained from Major Forbes, and the Reading-room, the Grill-room and the Cafeteria will be used as sitting out rooms.

The dance is scheduled to start at nine o'clock and the couples will sway to the orchestra's tunes till one in the morning. The tables will be disposed around the dance hall, but the price of the tickets does not include refreshments.

Lecture In Music

Mrs. Bowman Will Address Students

A lecture, sponsored by the Faculty of Music, McGill University, will be delivered in the Conservatorium this Friday. The lecturer is Mrs. H. M. Bowman, and her subject will be "New Phases in Musical Education." Mrs. Bowman specializes in class piano work, and is, at present, connected with the Educational Department of the University Press.

The lecture will begin promptly at 8:30.

The lecture will begin promptly at 8:30.

This is a distinguished prize for engineers, inventors and scientific workers. In addition to the distinction which it carries as an award, it is also worth \$1,000 in cash. It was first awarded in 1910, and during the war. The third time it was awarded was in 1924, and the fourth time will be this coming year. The prize was founded by a bequest of the late Charles Aeneas McCharles, who left ten thousand dollars, the interest upon which was to be devoted to the purpose.

Entry Qualifications

It is open to (a) To any Canadian, whether he or she be a student or not, who invents, or improves processes of treating Canadian ores or minerals. (b) To any Canadian who shall make any discovery that will minimize the danger in the use of electricity. (c) To any Canadian who has performed any marked scientific achievement.

British subjects resident in Canada for any length of time shall be construed as being Canadian.

References Necessary

Every candidate for the prize is required to be proposed as such in writing by some duly qualified person. A direct application will not be considered.

No prize will be awarded for any discovery or invention unless it shall have been proved to the satisfaction of the awarding body to possess the special practical merit indicated by the time and spirit of the bequest.

The committee of award will receive nominations for candidates up to November 1st, 1933. Nominations may be sent direct to Dean C. H. Mitchell of the committee at the University of Toronto.

Officers Elected

Seniors Discuss Extensive Program

A meeting of the class of Arts '34 was held yesterday in the smoking room of the Arts Building. Since Arts '34 is now the senior class, plans for a more active program than in the past were discussed, and an election of new officers was held.

The following new officers were elected: President, Bert Denton; Vice-president, Ronald Leatham; Secretary, Fraser Gurd; Treasurer, Kenneth MacClure.

Choral Executive Meeting

The Operatic and Choral Society will hold a very important executive meeting in the music room of the McGill Union at 2:15 o'clock sharp. As this meeting is of more than passing importance all concerned must be present. Louis Theobald, R. Carmichael, Harrison Jones, Tom Calder, Diok Harbert and Jean McQuais, Eleventh Selkirk, Jean Dunlop, and Eleanor Townsend are also asked to attend. Please be on time.

Physical Society Meets

Dr. J. S. Foster will address the second meeting of the Physical Society this Friday. His subject will be "The Chicago and Boston Meetings of the American Physical Society, 1933." The lecture will be held in the Macdonald Physics Laboratory at five o'clock, and all interested are invited to attend.

Organize French Class

The Department of Extra-Mural Relations for Graduate Students in advanced French conversation exclusively, is organizing a small class of between five and seven students. Classes will meet once a week for one hour, time to be arranged. The fee will be very reasonable. Will all interested please communicate with the Secretary of the above department.

Eternal Christ Was Theme Of S. Reid's Address Yesterday

Program For Rest Of The Week Outlined

RELIANCE ADVOCATED

Dr. Hill And Lyall Detlor Will Speak During This Week

Dr. Arthur Hill, as Chairman, opened the second meeting of the Inter-Varsity Christian Fellowship yesterday afternoon with a reading from Scripture, then proceeded to outline the program for the remainder of the week after announcing that an informal meeting was to be held later in the evening, open to all, at the home of Stanford Reid at eight. There will be afternoon meetings from 5 to 6 p.m. today, tomorrow and Friday. Dr. Arthur Hill will be the speaker today and Friday, while Lyall Detlor will speak on Thursday. Besides this there will be short prayer-meetings daily from 1:30 to two at the Diocesan College. The Chairman then called on Stanford Reid to speak on "The Christ of yesterday, today, and tomorrow."

Used Text

Stanford Reid took as the text for his address a quotation from the Epistle to the Hebrews: "Jesus Christ the same yesterday, today, and forever." All things, the speaker pointed out, have experienced great changes even during the last few years, nothing has remained stable except Jesus Christ.

We all, he affirmed, have our yesterdays, many of which we regret, keenly and from which we are unable to escape, and from this fact spring many evils. Innumerable suicides, sacrifices and unfortunate circumstances of all kinds arise. Jesus Christ is the only power to erase our yesterdays, and he laid down his life to that end. "The only way to overcome the failures of yesterday," declared S. Reid, "is to look to the Christ who paid the penalties of yesterday."

Our Today

Our today, continued the speaker, are a great factor in our lives too. It is on our today, that we have to face our difficulties. People often try to avoid their difficulties by taking their lives, but the difficulties will surely continue to follow them unsolved wherever they go. The Old Testament Commandments tell us what to do, but we lack the power to do it. That power is supplied by laying our difficulties in the hands of Jesus Christ. "The Christ of today," said Stanford Reid, "is the one to whom we should look in the trials of today."

Although Science has given us many wonderful inventions, went on the speaker, it has never provided us with (Continued on page 4)

Forsey Discusses Present Stability

Economics Lecturer Addresses St. James Literary Society

"A country cannot be run as a business proposition," said Eugene Forsey, lecturer in Economics, at the meeting of the St. James Literary Society last night. In his speech, the subject of which was "Can Capitalism Stabilize Itself?" Mr. Forsey seemed generally pessimistic concerning the stabilization of capitalism, particularly because of the rigidity of the system. However, he advocated no particularly radical measures for recovery.

No new business was brought before the meeting but it was announced that Dr. Cyrus MacMillan's address will likely be postponed. Mr. Forsey presented his address to a large and appreciative audience and brought up various points. He believes, that, even if capitalism does survive this economic depression, the present state of affairs will recur in the near future and that, in the event of another war, it will be a "war to end capitalism."

Engineers Vote

Engineering '37 held their elections yesterday. The majority of the class was on hand to vote, and the following men were chosen to guide the class for the coming session: President, Freeman Svennington; Vice-President, Herbert Westman; Secretary, William Horwood.

New Officers

A meeting of Commerce '36 was held on Monday morning at 10 o'clock in the Arts Building, when class officers were elected for the coming year. The results were as follows: President, John Kennedy; Vice-President, Robert McQuiff; Treasurer, Fred Wygle; Secretary, Margaret Dumfries.

Vol. XXIII—Wed., Oct. 18, 1933—No. 12

An Exhortation

FOR many a session it has been the custom of the student body to avoid all meetings of the Students' Society and to impede that body's progress by their absence. By this statement we do not imply that the situation is intentional, such would be a grave slight on the interest of the student body in their own affairs, but it is rather a lapse of the active interest that might be shown.

During the last session, a meeting was held at which a capacity crowd was present. They were actively interested in the matter on hand. We feel that the student body treat the regular Student Society meetings as purely routine, humdrum affairs. They consider that they are not needed, that there are other persons who will be there, and that a mere quorum will be sufficient.

This state of mind is unfortunate. The average student is very particular as to the way he spends his cash, and yet he forgets at the same time that he is subscribing to the Students' Society, and is entitled to have his share in the placement of the common funds, and the government of his organization. Every student can and should take an active interest.

We therefore exhort the members of the Students' Society and particularly the freshmen to appear at the meeting this afternoon, and take part in the proceedings, as is their right.

The Big Bad Wolf

CONSIDERABLE amusement has been derived recently from a motion picture cartoon involving three little pigs. From the entertainment point of view it is of considerable merit. It carries, however, a potential moral which is worthy of consideration, especially as the moral can easily be overlooked.

The story of the three little pigs was told to us, in most cases, before we ourselves were able to articulate the sounds and syllables and words of which it is composed. It holds the distinction of being among the highest rated, and therefore, the most favourite of nursery rhymes. The lesson or moral which it is supposed to convey, that of diligence and assiduity among other things, has been made use of by the authoritative parent as well as the warning schoolmaster. We are so well acquainted, in fact, with the subject as well as the significance of this fable that we would be slighted, now that we are grown up, should anyone seriously bring it to our attention as part of our moral guide.

And yet, we cannot but consider how well it would have been for many people in particular, as well as for the world in general, had they used the foresight and understanding of the third pig. With the proper understanding, much of our economic ills might have been averted, or at least, mitigated to a certain extent. However, if this were inevitable, a due amount of foresight would certainly have effected some preparation on our part in order to meet the so called "impending gloom" with a firmer footing. Instead, we have built our houses with hay, and possessed with a good deal of assurance and over-confidence that "nothing ever happens," we were helpless when the "big bad wolf" paid his respects to us in the form of our recent crisis.

This lesson of the plight of the over-confident is applicable to us all in many instances as well as in many forms. Most suitable, however, for present purposes is the purport that it holds for the average college student. This is the time of the year when the thought of a future examination is brushed aside with an air of bold self-reliance, when the balancing scale between work and play leans heavily on the side of the latter. It is only when the threatening tide rises over the horizon that we become panicky, and repair to the "brick house" where we can sponge upon the work of our diligent comrades and hope for safety in that direction.

Aside from all other disadvantages of this sort of action on the part of many students, it is well for us now, in the beginning of the college session, to foresee the coming of the "big bad wolf" this January and next spring, and to prepare ourselves accordingly instead of relying on the work of others.

OUR GALLIC NEIGHBOURS

A BRIEF glance at the history of our modern Universities reveals the curious fact that most of them were of religious origin and given official recognition throughout the civilized world on the authority of Papal Bulls.

Such were the Universities of Paris, Bologna, Rome, Florence, Montpellier, Toulouse, Orleans, Poitiers, Bordeaux, Prague, Heidelberg, Cologne, Budapest, Leipzig, St. Andrews, and Glasgow, etc.

The primary and principal aim of these seats of learning being theology and connate subjects, their orientation was toward the Holy See. Profane matters were not of course taboo, but students went there mainly to qualify as professors. Rome has always claimed supervision in all educational matters. Some Universities like Oxford and Cambridge were not completely subjected to the Pope's authority, but even there, as shown by their Constitutions, the Bishop had some kind of superintendence.

By a strange turn of fate most of these Universities diverted from their original aim and turned their thoughts toward purely literary or scientific achievements. Many have disappeared altogether, others have kept but a shadow of their past fame.

European Universities have had quite an unstable status. They gradually loosened themselves from all religious subjection, but only to fall under the direct control of various Monarchs, and their development suffered severely from constant struggles between temporal and spiritual authorities.

In America on the contrary, the Universities were usually organized under a Government Charter, though many still retained denominational characteristics. This different conception originated from the fact that they were founded at a comparatively late period when the State had officially attained supremacy over the Church. The great wave of the French Revolution had more or less swept away many ramparts of clerical influence.

Amongst the Universities of Canada that have kept the ancient tradition of deriving their authority primarily from a Papal Bull, are the LAVAL University and the University of MONTREAL, in the Province of Quebec.

The University Of Montreal

Although officially recognized as an University only in 1852, Laval dates back to 1663 when it was founded as a Seminary by Mgr de Laval, first Bishop of Quebec. A Royal Charter was obtained from Queen Victoria, granting the civil power to confer degrees in the secondary and professional courses. The Laval University obtained a Papal Bull in 1876 that conferred upon it privileges of a Catholic University.

The quaint old building of Laval, the picturesque college bays, the "real variety" and tourney of its 7,000 students, conjure up before our eyes some of the delightful Universities of the Old World. The Students publish a weekly paper adequately entitled "L'HEBDO-LAVAL", spiced with wit and matters of interest, especially in the literary and social fields.

The Laval University, Quebec

It was founded in 1678 at Montreal as a branch of the Laval University of Quebec. Two faculties were opened at first: Theology and Law. Then Medicine in 1879. The Faculty of Arts was the last one to be established in 1887, and is nowadays by far the most important.

For years it was only a local branch, and although managed as an independent body since 1889, it did not confer degrees of its own. This brought about a bitter conflict for supremacy between the two cities—a conflict which still exists in other fields. In 1927 the matter was finally decided by a Papal Bull allowing the autonomy of the University of Montreal. There is still however close co-operation between the two Universities.

In 1920, the University was given a Provincial Charter by the Quebec Legislature, giving it legal existence as a separate body, with the power to confer degrees recognized all over the world. In fact the same power as our University enjoys.

The buildings on St. Denis Street, near St. Catherine, being inadequate, even with the limited number of faculties allowed hospitality there, a giant building is now being constructed across the Mountain, to the North of us.

All Classical Colleges of the Province of Quebec which are Roman Catholic have either to depend on Laval or the University of Montreal for their examination papers and degrees, with the exception of the Jesuit College (St. Marie, Brebeuf, and Loyola), which hold their own examinations, having only to go to the University of Montreal for the formal conferring of degrees.

The enrollment of the University of Montreal is over 5,000, including affiliated colleges. The students publish a weekly paper "LE QUARTIER LATIN", which is remarkably well written.

TALES From The Back Counties

"La Ligne"

WHEREVER ONE GOES in the 'north country' one hears constant reference to the mysterious 'ligne'. Being a man from the 'ligne' myself I venture to present a description of it to the layman. The 'ligne' consists of a single track railway, stretching from Hervey Junction to Cochrane. However, while this may suffice as a definition, 'la ligne' really embraces more than the ribbon of steel running like a snake between hills and lakes, over mountains and through vast tracts. It includes the villages, hamlets, deserted warehouses, and even the people themselves who live along it.

The first place of note is La Tuque, which is so well known that a description of the town would be out of place. The altitude of La Tuque is about 560 feet while that of Hibbard is 1460; hence there are many steep grades on the 80 miles of track between these two points. After leaving La Tuque the railway follows the St. Maurice river for a considerable distance. From the train it was once possible to see many interesting rapids, where crews of voyageurs toiled to get supplies to jobs for the winter's work. Those days however, have passed forever; the supplies are now carried by rail and the rapids are about to be swallowed up by a dam near Fitzpatrick.

The next point of real interest on the route is Parent, but before reaching this village one must pass through several places like Hibbard, one of the highest points crossed on the journey. At Casey a warehouse—now deserted—bears witness to a once thriving lumber industry at Manouan Crossing the Hudson's Bay Post reminds the traveller that the frontier days are by no means past. At Menjob a huge metal shed houses a number of motor boats and sometimes a plane, evidence of a new industry, the Tourist Trade. At Wykes may be seen a big station, now boarded up, once the shipping centre of large amounts of timber.

Parent is perhaps the most interesting and is typical of all the settlements on this highway of man. The village is located on the north side of the train track. At one time the town was a prosperous lumbering centre, but it has been hard hit by the depression. Most of the people who live there at present are connected with the railway in one way or another, for Parent is a divisional point, with locomotive sheds and section headquarters. The village itself consists of two streets, intersecting at right angles at the station. One street running parallel to the tracks is the business section of the village, on it are located the general stores and the big hotels, both of them. The other street is more of a residential section as most of the frame houses are used as dwellings and pool rooms.

It was once my fate to spend a night in this pioneer settlement. It was a toss-up whether we would sleep at 'The Imperial Hotel', 'Joe's Rooms' or in an empty box car. As the weather was threatening and the temperature dropping the last was discarded as impractical, and the former as extravagant. We went to 'Joe's Rooms'. After looking at the 'two bit flop', consisting of eight ticks with sacking over them, we decided to sleep in the 'First Class Rooms'—50c. After supper we bought some groceries for the following week and packed them in our sacks, upstairs in our room. The night, at about two o'clock, a disturbing noise was heard in the paper wrappers we had left on the floor. After turning on the light we discovered a huge rat near the foot of our bed, eating the ends of spaghetti that had fallen on the floor. He soon disappeared out of the window, and we returned to the land of pleasant dreams. However, he was not so easily discouraged, for after half an hour's peace he appeared once more. Pete and I were sleeping in a double bed, at least Pete was sleeping, I was worried about the food in the packs, perhaps the rat would eat the whole works and leave nothing but a few pack buckles behind. This could not go on. I took a boot and flung it into the middle of the wrappers, there was a great scuffle and a rat emerged, but instead of running away jumped on the foot of the bed, his beady eyes glaring at me through the gloom. Another boot must have destroyed his self reliance, for it moved slowly away, crawling up the bed, on the other side of Pete, and vanished through a hole in the wall.

There are many other little hamlets along the train track, most of them similar to Parent, among them may be noted Doucet, Senneterre and Amos, but once past this village we leave the true 'ligne' and enter the mining country, which is entirely different in outlook and attitude.

Not only are the towns remarkable, but the means of transportation are unique. The fastest and surest means of travel on this line is by 'fast freight', either in the caboose or on the rods, the former preferable, the latter, however, quite practical. These fast freights consist of trains bringing ore from Amos and west. They travel consistently and stop are few and far between. On the other hand the passenger trains, all three of them, are slow and precarious. They go east on Tuesdays, Thursdays and Saturdays if the trains going west get to Cochrane on time. 'Train times' are not guaranteed, is a fine motto, for 'la ligne' is no time table once the 'Galtico Bullet' has pulled out of La Tuque. The train will stop almost anywhere if a suitable signal is displayed. The approved method of stopping a train is by waving a sheet during the day and by making a fire at night. If the latter method is employed custom demands that you offer the train crew a big pannice of tea. The slow freights are quite a feature, they take any type of commodity, passengers in the caboose, the latter free if a game of cards is guaranteed. Most of the stations consist of a sign saying 'You are now at Manouan Crossing' or 'This is Mile 250'.

The train crews are most considerate, if the traveller has the train stopped by a river the brakeman will launch the canoe, the conductor load the packs, and the engineer wave a cheery 'bon voyage' from the cab. The last time we had occasion to leave the line the trainmen after shaking hands with us all said 'Be careful fellows, the rapids are bad, last year I shook hands with three lads and they were never seen alive again in this mortal world'. This is a great land, full of bright, optimistic and happy people.

John G. Brabant.

REVIEWS

Imperial

OPERAS when presented in concert form, especially such delightfully gay ones as Mozart's "Les Noces de Figaro" are usually inclined to become a little pedantic. The formal atmosphere of evening clothes stifles their "esprit"; the lack of colour and costume makes them seem unnatural. It was, therefore, a pleasant surprise to find that after last night's opening concert of the Canadian Opera Company's season one was almost entirely unaware of this tendency. The sympathy with which the singers handled their roles had preserved the life of the piece to a remarkable extent. It is a pity that the company can not see its way financially clear to present the operas on the stage, for seldom are the casts so well adapted for their respective parts both in appearance and in treatment.

Contrary to the usual rule, the outstanding performance, was given by the male leads; M.

Gerard Gelinas, who played the part of Figaro, and M. Paul Leduc, who interpreted Le Comte Almaviva. Mme. Germaine Bruyere's rich voice, enhanced by a very mature technique, did much to make the concert a success.

Special mention must be made of Mme. Blanche Girard's rendition of "L'ho perduta", which was the outstanding solo of the evening and the excellent work of the chorus which was no doubt due largely to the careful direction of M. Victor Brault.

It is to be hoped that the patronage at the next two concerts will be such as to permit a full stage-set opera this spring. The potentiality for a good production is there.

G.L.P.

Science Tends To Discourage Poetry Says Doctor Files

(Continued from page 1)

percussions on the poets. They can pursue one of two courses. They either lose confidence because they are no longer sure of power or affect superiority to the desisters. They may flout the Philistines and press on in the supposed interest of pure art, into unintelligible writing. They often assume a freakishness which is not so effective as they imagine in escaping from the herd.

Dr. Files denounces the cult of originality rather than any vital, imperative urge for self expression. The unparalleled examples on the other hand, of new poetic forms is a sign that poetry still has life.

New Moulds Needed

Dr. Files thinks it doubtful that the transposition and mental conflict of our time could be expressed in old moulds. While there is much affectation in the new poetry, many are creating new forms because they have something new to say. This is best illustrated by T. S. Eliot.

Although many critics have accused the modern poets of lack of discipline in not conforming to older moulds, others describe them as winning new freedom in terms of a new discipline, the escape of a poet not from discipline but into a subtler form of laws, which explains the poets temperament and ideas in no haphazard way.

Great Influence

Eliot has a great influence on the younger generation. His first volumes appeared in 1917, a collection of poems representative of his undergraduate days in Harvard. His next volume, "Waste Land", appeared in 1922, Ash Wednesday in 1930.

Although Eliot wrote free verse, it does not signify freedom of all responsibility as an artist. He is scrupulous in technique. Every line is deliberate, showing an unparalleled artistic conscience. In addition to his activities as poet, critic, and editor, Eliot added much to his influence in this triple role, seen later in a revaluation of tastes, in a revision of literature, so as to give more credit to the classical school especially Dryden and Pope. A connection may be observed between Eliot and Pope in their insistence on discipline and order.

Has Divided Mind

Eliot found in Tristan Corbiere and Laforgue a state of mind which harmonized with his own. These two poets showed mental conflict by the method of using varied forms and moods in alternating verses. This method was an ironic way of showing their sense of the disordered, illogical world in which they lived. Eliot figures as a poet of disillusion.

This division is produced in Eliot's mind by the opposition of his fastidious training to his vulgar surroundings. He was greatly affected by the fastidiousness of certain circles at Harvard with which he came into contact. At the same time he was aware of the rough and ready world that surrounded him. In his work he shows the impression made by urbanity of the twentieth century on one who tries to confine himself to the fine things in life.

Woven into the rich freight of memory and history which his works contain, is the idealism, egotism and shallowness of the 20th century in pursuit of pleasure, money, and even education. He stings us awake to a suggestion of our needs and our pathetic indifference to the spiritual superiority of our ancestors. "Waste Land" shuttles between two worlds; transposing one into the other, showing the spiritual drought of the present in comparison with the past.

Lines Haunt Men

Dr. Files pointed out that it is hard for the reader to understand Eliot because of his great erudition. The poet himself recognized this fact in his copious annotations in explanation of his symbolism in "Waste Land". However, it cannot be denied that his lines haunt men.

Rangers And McGill Clash Tonight In Important Game

Red Seconds Need Win To Leave Cellar Position

Victory For McTeer's Team Would Tie Up Lead — Ottawans Have Former R.M.C. Star On Line-Up — Keen Struggle Expected For Four Point Award — Strong Squad Will Don Red Jerseys — Rangers Won Both Games Last Year

OTTAWA RANGERS, Capital city entry in the Q.R.F.U. intermediate loop come to town today for a scheduled clash with George McTeer's Red seconds under the floodlights of Molson Stadium. The Little Rough Riders will be raring to go as the contest offers them a golden opportunity to grab off four points and top position in the league. The McGill gridders will take the field equally determined to stop the Ottawans and move out from the cellar position which they now occupy. A real battle should ensue for the high stakes.

Lynch Coaching Ottawa
At present Rangers are riding in third place with one win to their credit. O.N.R. having dropped a game to them on the M.A.A.A. field last week. Charlie Lynch, star quarterback with the Ottawa Big Four champions of several years ago is guiding the des-

Int. Q.R.F.U. Standing	P.W.L.D.F.A.P.
Westward	2 2 0 0 26 7 4
O.N.R.	3 2 1 0 43 14 4
Ottawa	3 1 2 0 20 30 2
McGill	2 0 2 0 1 39 0

ties of the Rangers and has several outstanding performers sporting his colours "Pop" Irvin, former R.M.C. backfield ace is one who will take a lot of watching. Clair Forster, prominent in baseball circles, will probably do the kicking for Lynch's squad and will no doubt make use of his passing ability as well.

Last year McGill lost both engagements with the Capital gridders, decisive margins being chalked up here as well as in Ottawa. The inability of the McGill team to make the trip to Ottawa is the reason that one game must decide the award of the four points this year.

New Signals In Use
Coach McTeer has selected a powerful team for the fray and yesterday's light workout showed them to be ready to give Rangers a real game. A new set of signals has been worked out since last week's loss to Westward and have proven highly successful. Hanford Conklin will direct the team from his regular quarterback post. He has a good passing attack, well interspersed with bucks and end runs, ready to fire in the direction of the Ranger line.

A fast heavy line will be used tonight and expectations are that the Rangers will find considerable difficulty in crashing their way through Montgomery, Fleming, Howard and Gorman will alternate at inside wing positions flanking either Black or McDougall at snap. Deakin, Taylor, Gurd, McGregor and McRobie have been chosen to hold down middle wing posts with Bishop, Carswell, Hebert and McDowell playing ends. The latter four are important cogs in the aerial attack.

Sellar To Do Kicking
Mowat will go in at flying wing with Law, Boyd, McLernon, Edson and Sellar sharing the backfield duties. Bill Sellar will probably be assigned the kicking duties and will have plenty of work on his hands if the Ranger booters are in form.

There will be no training table tonight but all the players who are taking field House at 7:15 p.m. sharp.

SPORTS NOTICES

McGill Hoop Mentor To Address Officials

COACHES, Managers and referees will be in for a session of instruction tonight at the Central Y, when Coach F. M. Van Wagner, McGill's track and basketball mentor, is guest speaker at the second of a series of lectures sponsored by the Y, for the benefit of basketball officials. His subject of discussion on this occasion is "Psychology of Basketball." The entire series comprising some five or six talks by city authorities is under the direction of Hart Deveny, assistant physical director of the Y. Tonight's lecture commences at 8 p.m., and the public is invited to attend.

SOCCERMENTOPLAY SUNLIFETOMORROW

Meet Local Team In Preparation For Varsity Tilt

THE Intercollegiate soccer team will face stiff opposition tomorrow night when they meet the strong Sun Life aggregation at 7:00 p.m. on the Upper Stadium.

This is the final test for Coach Finlay's men prior to their all-important contest with the champion Varsity team in the Queen City on Saturday next. By winning this game the McGill team would virtually clinch the Intercollegiate soccer crown, as they would then only need a victory over the lesser rated squad from R.M.C. in order to gain the title.

Good Record to Date

Coach Finlay's team commenced their training on Sept. 15 and have registered two victories out of three starts. Their only reverse coming in the month of September when they bowed to the Shell Oil team. Lack of condition was probably the cause of this defeat, and they have since beaten the Shell Oil and Sterens elevens.

The Redmen hope to make it three straight prior to the Varsity game by taking the Sun Life tomorrow night. Following is the line-up of the McGill team: Goal, Ross; fullbacks, Harkness, Reece; halves, Minnion, Flood, Horsnell; Innis Nolan, Cooper, Jones, Carter; alternates, Janikun, Feitner, Lowe, Ross, W. D.

English Rugby XV Faces Local Team On Lower Campus

A VERY interesting Rugger match is scheduled to take place this afternoon when the Intercollegiate team lines up against the strong Bank of Montreal fifteen at 3:00 p.m. on the Lower Campus.

A return game with the M.A.A.A. team has been arranged to take place tomorrow night under the floodlights of Molson Stadium. The Red team hopes to avenge last Saturday's 28-10 defeat at the hands of the Winged Wheelers on the Westmount field, and will have the advantage of playing this game on their home grounds.

Prepare for Varsity

Both of these games are being played in preparation for the defence of the Intercollegiate championship which has been held by the McGill team for the past seven years. The squad is scheduled to play in Toronto against U. of T. next Saturday, and these two games should do much to put the team in the best of condition for this test.

Following is the line-up for this afternoon's game: Farrell, Romans, Gascoigne, Foote, Todd, Wooten, Angus Butterfield, Davis, Munroe, Stapleton, Gardwell, Foster, Williams, Gildea.

Prize Winners

The winners of the prizes offered by the Oriental (Semite) Department were E. H. Steinberg of the Graduate School, and J. Dove. E. Steinberg won the A. Pierce Prize in Hebrew, whilst J. Dove took the Neil Stewart Hebrew Prize.

For the first time in its history the University of California at Los Angeles is offering graduate work.

Strong Varsity Contingent Threatens Red Track Title

McGill Men Travel To Kingston Tomorrow Afternoon To Defend Crown — Westheuser Powerful Field Entry For Toronto — Isbister Stewart And Passmore Also Expected To Gain Points For Blue Squad — Worrall Captures Cameron Track Trophy

WHEN McGill track and field aces entrain this Thursday afternoon headed towards Kingston and the intercollegiate cinder championships, they face some of the strongest opposition in years from their traditional rivals, Toronto Varsity. The roster of the Blueboy team as recently announced, presents some names of college athletes, who have performed outstandingly in track and field realms during the past few years, and it will necessitate a stern struggle on the part of the Redmen to retain their intercollegiate crown against this threat.

Increased Activity Pleasing To New Wrestling Coach

Lengthens Period Of Drills To Accommodate New-comers

THE wrestling club, long noted as the most apathetic group on the McGill athletic horizon has been renovated, repaired and in general made to suffer a radical series of changes. Yesterday's practice in the High School Gym attracted so many entries that Coach Saxon has found it necessary to add another thirty minutes to the practice period and tomorrow's drill will begin half-an-hour earlier. The display of the Red grapplers last year had been most disappointing, very few of the men being in the best condition to carry on a brisk ten minute's battle, but conditions look much better this year providing interest can be kept up.

The past few workouts have been continued to an explanation of the simpler holds and a strict course in calisthenics. Coach Saxon surprised his men somewhat by entering into the drill personally, showing each man individually the whys and wherefores of the holds under question. This method is more than successful in that each grappler finds himself completely

LARGE ENTRY LIST FOR WOMEN'S MEET

Annual Track Championships To Be Contested October 27th

THE women's annual track meet will take place at Molson Stadium on Friday, October 27, and judging from the large number of entries received so far, it is evident that enthusiasm is up to the boiling point. Although temporarily held up by bad weather, practices are scheduled on Tuesdays and Thursdays, from 10 to 1, and on Wednesdays, from 11 to 12.

Both individuals and classes will compete for the trophies, the system of scoring being such that any points won, count both for the individual and for the class. This inter-class championship rates as one point towards the banner which is awarded to the class gaining the highest score in all activities during the year.

The individual champ, last year was Babs Goulding, while the M.S.P.E. won the inter-class championship.

Entry List

Following are the entries, received so far:

60-yard dash—B. Smart, E. Enman, B. Webster, S. Ritchie, E. Jack, B. Smith, O. Dawson, B. MacPherson, V. Pick, E. Walbridge, B. French.

100-yds.—B. Smart, E. Enman, R. Smith, B. MacPherson, V. Pick, E. Walbridge.

Broad Jump—E. Enman, B. MacPherson, E. Walbridge.
High Jump—B. Webster, M. Perowne, M. Ziegler, B. French.

42 CONSECUTIVE YEARS
When Dean W. R. Appleby of Minnesota University saw the Minnesota-Indians Big Ten opener there last Saturday he began his forty-second consecutive year watching a Gopher grid team in action. It was in 1891 that "the grand old man" first came to the university and he hasn't missed a game since.

Credit Policy Essential For Recovery Acts

(From The Royal Bank Bulletin)

THE RECESSION in volume of steel production and the other signs of hesitancy in the upward trend of business in the United States have aroused renewed demand for extreme inflationary measures. This agitation is producing new weakness in dollar quotations, but it has not resulted in a fresh rise in prices. The increase in prices must be brought about gradually if the movement is to be properly controlled. No new legislation is necessary to produce the promised increase in price level, and the discussion of governmental inflationary measures, such as the issue of fiat money, to meet government expenditures, creates uneasiness which tends to defeat the programme of recovery.

The market has a tendency to pay entirely too much attention to quotations of the dollar in terms of foreign exchange. It has failed to understand the principles governing the expansion of credit within the country and its effect upon prices and activity of industry. At the present time the great inflow and outflow of short-term money, which is the major factor in determining exchange quotations of currencies, is not occurring in response to the needs for either long-term or short-term capital in any country. Moreover, this rapid movement of short-term money has little influence on the financial condition of the country from which it flows, or upon that to which it goes. Since it is not accompanied by a movement of gold, it does not have a marked influence in contracting the volume of credit in the country of its source, nor does the country to which it goes dare to expand credit, since it may leave again as quickly as it came. The ebb and flow of this short-term money has a large influence upon foreign exchange quotations, but no marked effect upon either the price level or the volume of credit in either country. At the present moment, for instance, the value of the dollar in terms of foreign exchange is considerably below that level which would be justified by its purchasing power within the United States. It is this purchasing power which is the ultimate arbiter of a currency's value and, in the long run, the internal and external values of a currency must come together.

Exchange Low
Since the present exchange value of the United States dollar, in terms of gold, is now so low that even a reasonably substantial rise should not prevent the achievement of a higher level of commodity prices, it might be well to concentrate attention upon those forces which may be employed to encourage the expansion of industry and trade, and dismiss exchange quotations as of secondary importance. Price levels depend upon the volume of money and credit in active use and their ratio to the volume of production. A constructive monetary policy for the next few months would consist in the encouragement of the expansion of credit at a rate somewhat greater than the rate of expansion of production. It is in this manner alone that a strong upward trend in prices may be fostered; a trend which may be kept within control when the desired level has once been attained. In reality, the remarkable recovery since March, perhaps the greatest reversal in trend in the history of the United States, has been financed by a more rapid turnover, or increased velocity, of the fund already available and by the funds which have come out of hoarding in response to the growth of confidence.

A price recovery is essential to the success of the NRA. A programme designed to achieve higher prices was announced as an integral part of the plan of recovery. Industry cannot support considerably increased costs if prices do not keep pace. The policies of the NRA—agricultural control, "buy now," and public works—cannot be successful if undertaken in opposition to the general monetary policy. This was shown by the experience of 1930.

Rise Insufficient

Yet the present period of hesitancy has made many groups in the United States feel that there has not been a sufficient rise in prices. They are demanding violent inflation and suggesting drastic remedies; this discussion has tended to undermine the confidence which was almost re-established. Under more normal financial conditions the measures which have been taken by the central monetary authority on one or two occasions in the last year and a half, would have been adequate. The apparent failure of business to respond to the classical treatment of cheap money has been due to the fact that this remedy was not tried until the banking machinery of the United States had been seriously crippled and confidence gravely disturbed. To the extent that the banking machinery is not working smoothly, proportionately stronger methods must be employed by the central monetary authority. It is of supreme importance, however, that such measures should be of a reasonable character and in accord with normal banking practice so that when a set price level has once been achieved prices may be maintained at that level and further inflation prevented.

To any action there must be some

Increased Activity Pleasing To New Wrestling Coach

(Continued from page 3)

separated from any wrong delusions he may have about some grip.

Veterans Appear

The persistent appearance of the regulars at these early practices clearly indicates the advance wrestling has made and also the keen determination of the Red representatives to avenge that miserable showing of last year's Intercollegiate B.W. & F. Assault when McGill managed to score but one victory in eight bouts.

Myer Gelfman, Intercollegiate 145-lb. champion two years ago, who made an unsuccessful attempt last year to recapture his title, has placed himself under the hands of Coach Saxon and is working seriously for another bid at the title. Archie Pistreich, who was one of the surprises unfolded last year when he put up an amazingly stout although losing battle, is likewise putting forth a big effort to earn the 165-lb. honours for McGill and a major M for himself.

Children's Plays

Casting For "Aladdin"

Casting for "Aladdin and the Wonderful Lamp" will be held in Moyses Hall on Wednesday, Oct. 18th, and Thursday, Oct. 19th, from 2.30 to 5.30 p.m. Men especially are asked to turn out for the try-outs as there are many male parts. Women who can sing and dance are also required. There is a certain amount of incidental music in the play and any students interested who can play wind or string instruments or the drum are asked to leave their names in Miss Gray's office backstage.

Workshop Department Of Players' Club

There will be a rehearsal for the following at 3.00 o'clock this afternoon in The Players' Club Room—Misses I. Crutchlow, M. Edgar, J. Smart and Messrs. G. Browne, E. Piper, K. Wille and A. K. Robertson. There will be a rehearsal in the Music Room at 3.00 o'clock this afternoon for the following: E. Weldon and P. Vircher.

Dearth Of Rats Greets Biologist

Morgantown, W. Va.—"The rats came out, the cats came out, From every belfry bats came out!"

So runs the old story, but the biology department is inclined to think that it was more or less unauthentic. An ambitious instructor was authorized by Prof. C. R. Orton, head of the department, to supply the rats which are to be dissected Tuesday by students in biology 1. Traps were set along the wharfs, in various buildings on the campus and in the city, but not a single rodent was obtained. Finally the young instructor gave up the chase as a bad job, and yesterday's papers carried an advertisement which read: "WANTED—150 full grown live rats by October 16, 10c and 20c each. Deliver to Biology department, Science hall, West Virginia University."

As yet, no rodents, old or young, big or little, have been brought to the department. Members of the faculty are amazed at the lack of response of both the rats and the people. Perhaps the canny animals are 'holding out' for bigger traps and more cheese, or perhaps they have all starved to death. At any rate, any person who brings a live rat to the department of biology headquarters between today and Tuesday will receive between 10 and 20 cents according to size, age and physical condition of the specimen.

Law students at the University of South Dakota have issued a proclamation that they plan to attend open house parties of the sororities on the campus. They are the first group to do this for the past 25 years. It will probably take an extradition case to get some of them out of certain sorority houses on time.

LOST

A fountain pen, Monday afternoon in Registrar's Office or on the campus. Mottled. Return to Bill Gentleman. (18)

degree of reaction, and violent inflation would set in motion forces which would require strong counteraction if credit and prices are to be held under due control. The general price level must be raised by a gradual but persistent policy. The figures of the Federal Reserve Banks from August 30th onward indicate the creation of that type of pressure designed to produce the increase in volume of credit essential to continued increase in extreme and unintelligent inflationary measures now being widely advocated may be avoided, but it cannot be gained that if reasonable methods do not produce adequate results within a comparatively short time, popular demand is likely to force the issue.

NOTICES

FELLOWSHIP
Christ Church Cathedral Guild of Fellowship meets every Wednesday evening at 8 o'clock in the Herbert Symonds Parish house, 1441 University Street. A cordial invitation is extended to students of the University to be present at these meetings. On Wednesday, October 18, the Rev. Leslie Dunwell, who has extensive knowledge of conditions in Russia will speak on Christianity in Russia. (15)

The Mining and Metallurgical Society will hold its initial meeting today at 5 p.m., in the main lecture room of the Mining Building. The chief business will be the election of officers. Newcomers will be cordially welcomed. (12)

CHANGING COURSES
Today is the last day for changing courses in the Faculty of Arts and Science. (12)

UNION INFORMAL
Tenders will be accepted for orchestra at Union House Informal to be held Friday night, October 20. Please apply to Don Small, McGill Union. (14)

TELEPHONE NUMBERS
Students who have not already given their telephone numbers to the Registrar's Office must do so at once. This information is needed for the Students' Directory. (12)

B. C. STUDENTS' REUNION
A meeting will be held today at five p.m., in Room 2 of the Macdonald Mining and Chemistry Building of all interested. Former students and graduates of the University of British Columbia as well as McGill students whose home is in that province are requested to attend. This meeting is called to discuss what kind of a reunion will be held and suggestions are desired. (12)

LECTURE
The Faculty of Music, McGill University, invite all interested to attend a lecture by Mrs. H. M. Bowman on "New Phases in Musical Education" at 8.30 p.m. on this Friday, at the Conservatorium. (15)

BAND NOTICE
Practices are scheduled for Thursday and Friday at 5 p.m. (15)

PHILOSOPHICAL CLUB
The first meeting of the Philosophical Club will be held in Strathcona Hall on Thursday, October 19, at eight o'clock. The subject under discussion is the nature of Philosophy and will be introduced by Professor MacLennan, the new Edinburgh Professor of Greek Philosophy. All interested are invited to attend. (13)

FRENCH CONVERSATION
A small class of between 5 and 7 is being organized by the Department of Extra-Mural Relations for Graduate Students in French conversation exclusively, for one hour a week. Time to be arranged. The fee will be reasonable. Will all interested kindly communicate with the Secretary of the above department. (17)

PHYSICAL SOCIETY
The second meeting of the Physical Society will be held at 5 p.m., on Friday, October 20, in the Macdonald Physics Laboratory. On this occasion Dr. J. S. Foster will discuss the Chicago and Boston meetings of the American Physical Society, 1933. All interested are asked to attend. (13)

DOCTOR BRILL
All those interested in obtaining half price tickets for Dr. Brill's lecture or Dr. Brill's and Elmer Rice's lectures, can do so by meeting Gandalar in the Daily office on Wednesday between 5.30 and 6.15 bearing a stamped, self-addressed envelope and fifty or ninety cents, as the case may be, or by leaving same at Tuck Shop.

Redmen To Open Initial Match Play For College Title

(Continued from page 3)
while Ken Farmer, another member of the 1932 title squad, will be back to defend his doubles crown held jointly with Murray.

Varsity Strong
Toronto will present the strongest team that has worn the blue and white colors in the last three years. This team will be led by Captain Syd Hermant, and Bill Pigott, both members of last year's squad. Added to these will be Eaton, who ranks among the best junior players in the province, Thomlinson, and Crowson, Shields, winner of the interfaculty net tourney, is ineligible for intercollegiate competition.

Last season's tourney play at Toronto provided an unprecedented situation, in that Toronto and McGill were tied, at the completion of the matches, with 13 points each. The officials finally decided to hold a six match play-off. These latter matches definitely proved the superiority of the Red team since they proved victors in five of the six contests.

Players' Club

man of the Students' Executive Council.
The Secretary-Treasurer of the So-

Eternal Christ Was Theme Of S. Reid's Address Yesterday

(Continued from page 1)
any mode of foretelling the future. Although the thought of the future may frighten us, there is nothing for it but to see it through, and place our confidence in the Christ of tomorrow. "All people look to the future with fear, except those who are trusting in the Christ of the future."

Sums Up
In summing up, Stanford Reid said that the Christ of today delivers us from the power of sin, and the Christ of tomorrow will keep us from sin in the future.

Dr. Hill then took the platform, and in a short speech expressed his agreement with the speaker's sentiments, and urged that we should trust in Christ even if we could not understand everything about Him. Dr. Hill then brought the meeting to a close with a short prayer.

Election Results Made Public As Society Gathers

(Continued from page 1)
distributed among graduates residing in Montreal and its vicinity was favorably received. The society also stated that they would appreciate a criticism of their radio talks so as to improve these as much as possible.

An announcement was made that as soon as the final business preparations were completed the work of building the new gymnasium would be ready to start. It was stated that the city had granted the land for the projected building.

The subject was brought up as to whether there was a lack of college spirit among the football followers and if so, whether this cannot be remedied. After a lengthy discussion, it was decided that this matter would be thoroughly investigated by the Athletic Board.

The president moved a vote of thanks to the Executive Secretary, Mr. Glasco and the meeting was then adjourned.
